

NSK WHEEL BEARINGS
PRODUCED WORLDWIDE TO ONE STANDARD

The one thing you can always rely on: Quality from NSK

As a strategic partner for automobile manufacturers and suppliers, the long-term satisfaction of our customer is our top priority. This we can only achieve if you can rely on our products and our services at all times.

That is why we promise: no matter where in the world a product from NSK is manufactured, the quality will be at the same high level everywhere. All of the NSK Group's production sites for the automotive industry are certified according to ISO/TS 16949:2009. This is just as true in Asia as it is in the USA and Europe.

Global standards apply to NSK wheel bearings

NSK wheel bearings comply with the technical specifications and quality standards defined by the group headquarters in Japan. Uniform process flows and our staff's high level of expertise also guarantee that our wheel bearings are always of the highest quality.

Approved by automobile manufacturers and suppliers

Due to the approval of the OEMs, spare-parts distributors can also be sure of receiving only high-quality and precision-fit wheel bearings – from every NSK factory.

NSK wheel bearings – Quality in every detail

NSK wheel bearings are compact and, due to their low weight, guarantee efficient fuel consumption. What's more, they also contribute to the vehicle's and the passengers' active and passive safety, through integrated ABS sensors and other technology. Only approved sources of steel, lubricants and seal components are used to further ensure the same performance no matter which factory is producing for our customers.

Be on the safe side – point by point

- › Certification of the production sites according to ISO/TS 16949:2009
- › Manufacturing to predefined technical specifications
- › Manufacturing to global quality standards
- › Use of the same raw material from long-established NSK suppliers
- › Experience and expertise of our staff
- › Guaranteed quality through standardised bench testing of the wheel bearings
- › Excellent service due to proximity to OEM production sites
- › OEM approval – guaranteed safety for the aftermarket

Production sites around the world for NSK automotive products

We manufacture our wheel bearings in the vicinity of the most important international automobile manufacturers and suppliers. The short distances promote regular communication and coordination and guarantee optimum service. For common, high volume, vehicle bearings are made at multiple NSK factories to support local supply.

NSK Production sites

America
